

Quality and Continuous Improvement Policy

Objective

Aker Solutions will use our experience and competence to safeguard our deliverables and continuously improve our processes to enable the energy transition

Commitment

- We shall design our processes to secure safe, reliable, and efficient operations and deliverables with the right quality.
- We shall provide training and support to ensure that our employees know and understand the requirements to which they shall deliver
- We shall learn from our experiences and continuously improve our processes to support our goal of being a learning organization.
- We shall provide the right level of resources to ensure that this policy is implemented appropriately.

Behavior

- We take personal and collective responsibility for the quality in our deliverables by ensuring that we understand and comply with applicable laws and regulations, contractual requirements, and our Management System.
- We actively address risks that impact our ability to meet our stakeholders' and customers' needs and expectations and implement mitigating actions to reduce these risks.
- We measure and make the performance of our processes visible, openly communicate challenges and learnings, and always seek the most efficient solutions.
- We share, learn from and implement best practices in our Global Management System through standardization, digitalization and automation.
- We engage in continuous improvement by proposing improvement ideas addressing end-to-end flow efficiency to minimize non-value adding activities.
- We take ownership of our own competence development by completing mandatory and recommended training and proposing learning activities to meet future competency needs.
